JarCube AI Assistant for myKONE

Instant, secure 24x7 answers on every myKONE page: tenders, reports and equipment in one chat.

THE PROBLEM

Getting help is slow, manual

- Every question needs a call or an email
- ServiceNow tickets wait hours to days
- Office hours only; experts overloaded

OUR SOLUTION

An AI assistant inside myKONE

- Trained on myKONE guides and FAQs
- Knows the user's tenders, reports, equipment
- Hands complex cases to a specialist

THE VALUE

Seconds instead of days, 24x7

- Self-service for routine questions
- Specialists focus on high-value cases
- Tickets created with full chat context

HOW IT WORKS

1 Train
Upload FAQs, guides and process documents

>

2 Connect
Link tenders, 3PI reports and equipment data

>

3 Embed
Add the chat widget to the portal once

>

4 Assist
Answer instantly, or hand over to a specialist

USE CASES

- "Where is my tender?"
- "Explain my 3PI inspection report"
- "Why was my elevator stopped?"
- "How do I add a new user?"

SAFE BY DESIGN

- Own company data only
- Separate data per customer
- No sensitive data leaks
- Grounded, not guessed
- Role-based access
- Hands over if unsure

ROLLOUT **Pilot > Connect data > Smart handover > Scale**

BACKUP 02

Today vs tomorrow: the support journey

Every question goes through people, phones and inboxes today. With JarCube most are answered on the spot.

TODAY

myKONE user has a question > **Calls / emails** Tender Specialist > **ServiceNow** ticket raised > **Assigned to** agent / developer > **Waiting...** hours to days > **Answer** by email

WITH JARCUBE

Ask in chat on any myKONE page > **JarCube** understands intent > **Knowledge base** general questions > **User's own data** account questions > **Instant answer** in seconds, 24x7

Not sure or complex? Handed to a Tender Specialist, with a ticket created with the full chat history

No self-service

Even a simple "what is my tender status?" needs a call or an email.

Slow answers

Users wait in inboxes and ticket queues while their work stalls.

Specialists overloaded

Experts spend their day on repeat questions instead of high-value work.

Office hours only

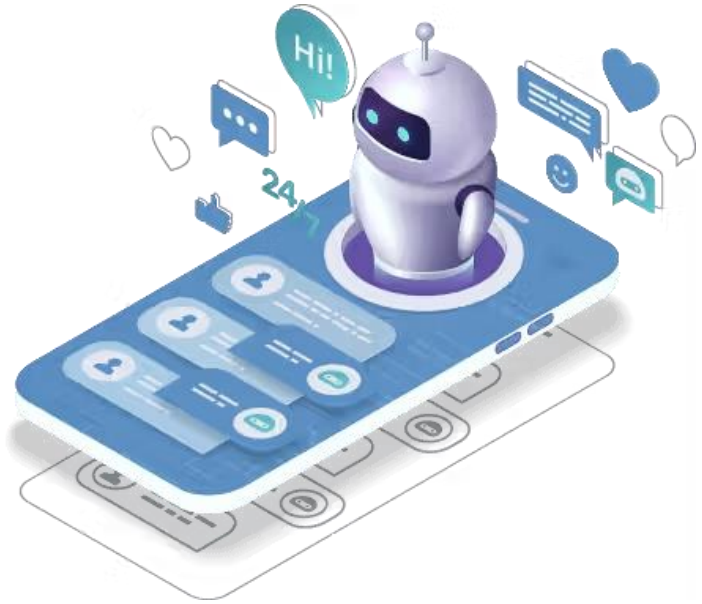

No help in the evening, at weekends or across time zones.

No call, no email, no wait. Specialists step in only where they add real value, with the full context.

BACKUP 03

Meet JarCube

An AI assistant that learns your platform and talks to your users

"Ask me anything about your tenders, reports or equipment. I'm here 24x7."

Trained on your data

Learns from myKONE guides, FAQs, process documents and website content.

Answers instantly

Natural conversation at any hour, in seconds instead of days.

Knows the user

Answers about the user's own tenders, reports and equipment.

Knows its limits

If it is not sure, it hands over to a specialist instead of guessing.

Keeps humans in control

The support team sees every chat and can take over at any moment.

Works everywhere

Website widget today; WhatsApp, Telegram and more when needed.

Keeps learning: JarCube collects the questions it could not answer, so the team can teach it and it improves every week.

BACKUP 04

Use cases: the assistant in the customer's workflow

Users keep working in myKONE as they do today; the assistant is there on every page

USE CASE 1 | TENDERS

"Where is my tender?"

Customers check tender status themselves, without calling a specialist.

What is the status of my tender for Tower A?

TND-2041 (Modernisation - Tower A) has been In review with the KONE tender team since 28 Sep. Next step: price approval, usually 3-5 working days.

Do you need anything from me?

Not for this one. But TND-2029 is waiting for your site contact details. Shall I open that form for you?

USE CASE 2 | 3PI REPORTS

"Explain my 3PI report"

Plain-language explanations of findings, severity and next steps.

Explain my latest inspection report in simple words.

There are 3 findings on E-03. One is urgent: A-12, a worn door safety contact, which should be fixed before the next inspection. B-07 and C-03 are smaller fixes.

Can KONE fix these?

Yes. I can request a repair quote for all 3 findings and share it with your tender specialist.

USE CASE 3 | EQUIPMENT

Built into the Equipment page

It knows which equipment the user is viewing, so there are no IDs to type.

Why was this elevator out of service last week?

E-03 was stopped for 3 hours on 29 Sep for a door-operator repair (work order WO-5512). It has been running normally since.

When is the next maintenance?

A visit is planned for 14 Oct, 09:00-11:00. Do you want me to add it to your calendar?

Use case 4: quick questions, answered on the spot

Questions that users email about today get an instant answer instead

PORTAL HOW-TO

"How do I add a new user to my company account?"

TENDER PROCESS

"Which documents do I need to submit a tender?"

INVOICES

"Where can I download my September invoice?"

STATUS MEANING

"What does "Awaiting customer info" mean?"

TIMELINES

"How long does tender approval usually take?"

CONTACTS

"Who is my Tender Specialist and how do I reach them?"

24x7

always available

Seconds

instead of days

Multi-part

answers every part of a question

Learns

from unanswered questions

BACKUP 06

Safe by design: smart answers, no sensitive leaks

JarCube is helpful, but only within what each user is allowed to see

01

Only your own data

Users only get answers about their own company's tenders, reports and equipment.

02

Separate data per customer

Every organisation's knowledge is stored separately. Nothing crosses over.

03

Holds back sensitive data

Internal notes, confidential pricing and other customers' data are not disclosed.

04

Grounded, not guessed

Answers come only from trusted myKONE content. It never makes up policy.

05

Hands over when unsure

When confidence is low, the chat goes to a specialist instead of risking a wrong answer.

06

Role-based access

Admins, agents and auditors each see only what their role allows.

BACKUP 07

The JarCube dashboard for the support team

One place to watch, join and improve every conversation

Live inbox

BACKUP 09

Before vs after

What changes for users, specialists and KONE

	TODAY	WITH JARCUBE
Getting help	Phone call or email	**Chat on any myKONE page**
Tender status	Ask a Tender Specialist	**Instant self-service answer**
3PI reports	Read alone, or call for help	**Plain-language explanation and next steps**
Availability	Office hours	**24x7**
Response time	Hours to days	**Seconds (complex cases go to a person)**
Specialist workload	Repeat questions all day	**Only complex, high-value cases**
Tickets	Raised manually in ServiceNow	**Created with the full chat context**
Visibility	Scattered emails and calls	**One dashboard with reports**

BACKUP 10

Proposed rollout

Start small, prove the value, then scale

1

PHASE 1

Pilot

- Train on myKONE FAQs & guides
- Widget on the portal
- Quick-question answers

2

PHASE 2

Connect data

- Live tender status
- 3PI report explanations
- Equipment page assistant

3

PHASE 3

Smart handover

- Specialist takeover in the dashboard
- Tickets with full chat context
- Hand-off to ServiceNow

4

PHASE 4

Scale

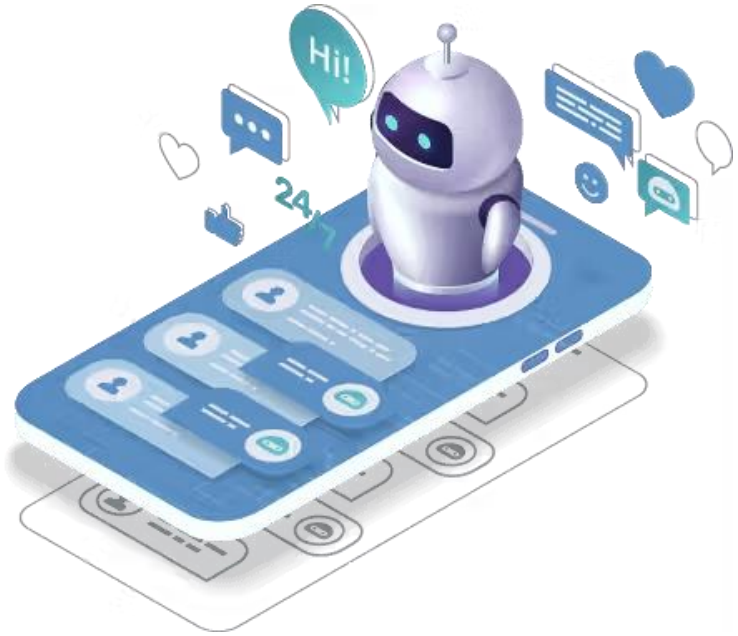

- More countries & languages
- WhatsApp & other channels
- Reuse on other platforms

SUCCESS MEASURES — **Share of questions solved by AI | Response time | Specialist hours saved | User satisfaction**

Thank you

From a phone call and a ticket queue to an instant, secure answer on every myKONE page.
